John,

Can you have REI provide soil boring logs and field notes for the September field effort, and the field notes from the well installation? I would like to review the information and send it to our contractor so we can have some cross sections made. The field notes would be helpful to get a complete picture of what was being seen, for example, when the driller was encountering gravelly zones during drilling for those wells that were blind-drilled.

Thank you.

Bob Egan
